

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) Apparatus for viewing information from a mobile station in a vehicle, the apparatus comprising:
 - a display module configured to be installed in the vehicle and link with the mobile station to display information from the mobile station when the mobile station is linked with the display module; and
 - a control module coupled to the display module and configured to enable the display of the information from the mobile station.
2. (Original) The apparatus of claim 1, wherein the display module is configured to be built into the vehicle.
3. (Original) The apparatus of claim 2, wherein the display module is configured to be built on a windshield of the vehicle.
4. (Original) The apparatus of claim 2, wherein the display module is configured to be built on a dashboard of the vehicle.
5. (Original) The apparatus of claim 1, wherein the display module is configured to be added onto the vehicle.
6. (Original) The apparatus of claim 1, wherein the display module comprises a reflected display.
7. (Currently Amended) Apparatus for viewing information from a mobile station comprising:
 - a vehicle;
 - a display module built into the vehicle, the display module configured to be linked with the mobile station and display information from the mobile station when the mobile station is linked with the display module; and

a control module coupled to the display module and configured to enable the display of the information from the mobile station.

8. (Original) The apparatus of claim 7, wherein the vehicle is one an automobile, a motorcycle, a boat, a train or a plane.

9. (Original) The apparatus of claim 7, wherein the display module is built on a windshield of the vehicle.

10. (Original) The apparatus of claim 7, wherein the display module is built on a dashboard of the vehicle.

11. (Original) The apparatus of claim 7, wherein the display module comprises a reflected display.

12. (Currently Amended) A method for allowing users to view information from a mobile station in a vehicle, the method comprising:

installing a display module, configured to be linked with the mobile station, in a vehicle; and
enabling display of the information from the mobile station using the display module when the mobile station is linked with the display module.

13. (Original) The method of claim 12, wherein installing the display module comprises:
installing the display module on a windshield of the vehicle.

14. (Original) The method of claim 12, wherein installing the display module comprises:
installing the display module on a dashboard of the vehicle.

15. (Original) The method of claim 12, wherein installing the display module comprises:
installing a reflected display as the display module.

16. (Original) The method of claim 12, wherein installing the display module comprises:

installing the display module in one of an automobile, a motorcycle, a boat, a train or a plane.

17. (Currently Amended) Apparatus for allowing users to view information from a mobile station in a vehicle, the apparatus comprising:

means for installing a display module, configured to be linked with the mobile station, in the vehicle; and

means for enabling display of the information from the mobile station using the display module when the mobile station is linked with the display module.

18. (Original) The apparatus of claim 17, wherein installing the display module comprises:
means for installing the display module on a windshield of the vehicle.

19. (Original) The apparatus of claim 17, wherein installing the display module comprises:
means for installing the display module on a dashboard of the vehicle.

20. (Original) The apparatus of claim 17, wherein installing the display module comprises:
means for installing a reflected display as the display module.
